

PRESENTS

# CODING WEEK

*WEB DEVELOPMENT TASKS for CODING WEEK*

*Prepared by Varennya Tiwari*

**DEADLINE:** 16 May EOD

## PROBLEM STATEMENT

You need to create a website based on the low fidelity template provided below.

## INSTRUCTIONS

1. Choose either of the two provided low fidelity templates to design your website. You don't need to follow the design template strictly, some minimal changes and change of elements is allowed but overall layout and structure of the website must remain the same.

# TEMPLATE 1

## TEMPLATE 2

2. Use HTML to structure the website and CSS to design the website, there's no need to put much stress on the content of the website.
3. Use of different elements and creativity put into it will be taken in account during evaluation.

**NOTE: This task focuses on only designing the front end of the website. No need to work on actual functionality of website elements.**

**Since it's an introductory task, you aren't expected to make the website responsive, so no need to worry about that.**

## RESOURCES
